

- Do you want to make life easier for your Design and Technology Teachers in their planning, reporting and auditing?
- Do you want to raise standards and track student progress?
- Do you want to address the new National Curriculum orders 2008 with ease?

Now you can with Elementum Scriptor D & T 2008. It is a new planning, reporting and auditing solution for Design and Technology teachers ready for the new National Curriculum 2008. Elementum Scriptor D & T 2008 is the easy way to produce all of your Schemes of Work and lesson plans with your Design and Technology team.

Simply type into the software your intentions for your projects and what you intend to teach each lesson. That's it, until you wish to revisit and improve it for next month, term or year.

By using the new auditing tools for Key Stage 3 coverage, you can easily get a clear overview of coverage against the new Programmes of Study. Elementum Scriptor has each of the strands from the new Programmes of Study available to view at the click of the button! As each teacher identifies coverage, Elementum Scriptor compiles a Key Stage 3 analysis ready for your team to scrutinise.

Quality standards will improve as teachers edit existing planning. Teachers are enabled to work with the National Curriculum level descriptors for Design and Technology and share their own interpretation of the descriptors with the students. This makes it easy for the students to understand what their targets really are. By asking teachers to commit to the possible NC levels that can be achieved in a project, a report of entitlement is compiled for team analysis.

Ever changed a project part way through a term? No problem! Elementum Scriptor is a 'live' application and changes made anywhere are updated in all other documents.

Elementum Scriptor provides you with an easy to read document and all documents have a quality and consistent appearance.

Need personal planning space? Hundreds of plans can be kept, improved, shared and sorted in order. Why not pass on planning of team members who have left to new members of your team?

The Student Objectives and Targeting page is a must for every child. With this document, it is easy to share all of the objectives and possible levels of attainment for each project.

The Mark Book is a free application within Elementum Scriptor to keep up to date with the progress of every child from lesson to lesson. From ages 11 to 18 the Mark Book records progress and attainment and presents useful information. It is a child centred Mark Book and is a mind shift in thinking. Elementum Scriptor produces great reports. Share this information with Teachers, parents and students.

Elementum Scriptor is currently shipping with a promotion of Elementum Scriptor A & D, Mark Book and Audit totally free of charge.
